

Queen of Zero

Historic Charm Meets High Performance Building

Featuring products by

Garbage Disposals

- ☀ Completely redesigned to grind more types of food waste into tinier particles and do so quietly, the new InSinkErator[®] Advanced Series disposals feature re-engineered MultiGrind[®] and SoundSeal[®] Technology. Queen of Zero features three InSinkErator Advanced models.
- ☀ According to the EPA, every year, food waste contributes to 18% of total U.S. methane emissions from landfills. Using an InSinkErator[®] garbage disposal helps divert food waste to the WSSC wastewater treatment plant that will soon begin converting it to Renewable Natural Gas (RNG) and sold to the county to power their Ride On buses.
