

Queen of Zero

Historic Charm Meets High Performance Building

Featuring products by

Blower Door & Duct Testing Equipment

- ☀ The Queen of Zero will be tested for air leakage at multiple points throughout construction. Our first blower door and duct leakage test will be prior to drywall installation.
- ☀ Our Zero Energy Ready Home certification through the US Department of Energy requires air tightness at a minimum of 2.5 ACH50. Our goal is to test below 1.5 ACH50.
- ☀ Retrotec is a leader in the development and manufacturing of air infiltration equipment. The wifi-enabled DM32X Digital Manometer has the most diagnostic features of any gauge on the market.
